Re: Granville Solvents Site

Dear Mr. Felitti:

I would like to take this opportunity to confirm the agreements reached in our January 27, 2000 conference call with you and Kevin Adler concerning the Granville Solvents site.

We agreed that the compliance point for evaluation of groundwater protection standards is EW-1. It was further agreed that Maximum Contaminant Levels or cumulative risk-based concentration of those constituents detected at EW-1 will be used to evaluate the effectiveness of the remedy in the future. Constituents not detected will not be considered in evaluating the effectiveness of the remedy.

Thank you for your cooperation in resolving these issues. If you believe that I have misstated anything, please advise me immediately.

Sincerely yours,

Ben L. Pfefferle III
